DETAILED ACTION

The following action is in response to communications filed for application 10/826,553 on November 30, 2005.

Election/Restrictions

Applicant's election without traverse of Filing Control 2, Filling End Control 1, and Shift Control 1 in the reply filed on November 30, 2005 is acknowledged.

Since the lone independent claim is generic and allowable, no claims will be withdrawn.

Allowable Subject Matter

Claims 1-15 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the method for a shift control of a power shift transmission as claimed, and particularly including providing a filling pressure for an incoming clutch until a filling end; in the case of a manually trigger power shift, increasing the filling pressure corresponding to an order of magnitude of the clutch capacity of the outgoing clutch unit until the filling end, adapting the clutch capacity of the incoming clutch unit such that the opening of the outgoing clutch unit and the adapting of the clutch capacity overlap in time; and including the remaining controls of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ishii, Tabata, Okada, and Hollingsworth have been cited to show similar transmission controls.

Steinmetz and Holbrook have been cited to show similar clutch filling controls.
